The Future of Work is Just Beginning

Science

Transportation

Response

Manufacturing

Why are we here?

- To hear from you about your organization's perspective on the future of work, particularly the impact it has on physical and virtual spaces

What is NSF going to do?

- Design the next means of collaboration between industry, government agencies, non-profits and academia with the future of work research community, **based on your input**

How are we doing this?

- Tackle it in four workshops on:
 - Restructuring the Physical and Virtual Workplace
 - Mapping the Human-Technology Partnership
 - Fostering Reskilling, Upskilling and Lifelong Learning
 - Ethical Questions and the Implications for Policy

Restructuring the Physical and Virtual Workspace

EXPERT PERSPECTIVES

- Mandy Pant, Ph.D., Academic Research Director, Intel
- Kathryn Zickuhr, Labor Market Policy Analyst, Washington Center for Equitable Growth
- Jinsook Han, Growth and Strategy Lead, Applied Intelligence, Accenture

Restructuring the Physical and Virtual Workspace

BREAKOUT SESSIONS

- What will your future 'office' look like?
- How will your current workforce change in the future?
- Where will your workers be?
- What impact do you see on work-life balance?
- What technologies do you forecast to restructure your physical and virtual workspaces?
- How will the culture of your business/organization evolve?

Restructuring the Physical and Virtual Workspace

WRAPPING IT UP

- Report back from individual breakout sessions
- Discussion
- Follow-up: the morning after thoughts
